- ❖ The above rates cover working-/waiting and traveling days and are based on shifts of 10 hours/day
- ❖ Overtime will be charged on a basis of “pro-rata” +50% surcharge.
- ❖ Rate begins upon departure from home base.
- ❖ Crew rotation schedule determined in advance based on each job requirement.
- ❖ Client is responsible to provide
  - all spare parts if mechanical repair is a component of contract
  - all necessary tools and equipment including sealant pumps and guns
  - all required valve maintenance products including Valve Cleaner, Valve Lubricant, Emergency Sealants, Packings, sealant injection fittings and adapters.
  - as required at each location.
- ❖ Client is to pay in full in advance via bank wire transfer for each job as defined in the scope of work.
- ❖ Client is responsible for all Visa's, Work Permits and local taxes.

The most important component of the manpower contract is for all parties to clearly define and understand the scope of work in advance of crew mobilization so that we can provide a technician with the necessary training and experience to properly troubleshoot the problem and apply the correct procedures to effect a safe and reliable solution.

Sealweld Valve Maintenance Technicians are Certified by SAIT Polytechnic and specialize in servicing and sealing all makes and types of Ball, Gate & Plug Valves in-line and under pressure.
